

Title of the Project

Review 1

Faculty Name
Team Member Info
Name & Reg No

Topics

- Introduction
- Motivation
- Literature Review
- Gaps Identified
- Problem Statement
- Plan of Action/Member Tasks
- References

Introduction

- Introduction about the title only 4 points

Motivation

- List the topic's significance and mention which SDG it belongs to

Literature Review

S. No	Author , Title & Year of Published	Objective	Methodology
1	N Moustafa et.al., “A Holistic Review of Network Anomaly Detection Systems: A Comprehensive Survey,” <i>Journal of Network and Computer Applications</i>, Feb 2019.	Network Anomaly Detection Systems (NADS) in network defense systems for detecting and preventing potential threats.	Most of NADSs’ applications, such as Data Centers, IoT as well as Fog and Cloud Computing were discussed.
2	S Garg et.al., “A Multi Stage Anomaly Detection Scheme for Augmenting the Security in IoT Enabled Applications,” <i>Future Generations Computer Systems</i>, Mar 2019.	A way to Robust Anomaly Detection schemes which in turn necessitates the need for Efficient Data Analysis.	A Novel multi-stage anomaly detection technique like Boruta Firefly Aided Partitioning (BFA-PDBSCAN) has been proposed for the seamless execution of computations on IoT-enabled applications.
3	S Garg et.al., “A Hybrid Deep Learning based Model for Anomaly Detection in Cloud Datacentre Networks,” <i>IEEE Transactions on Network and Service Management</i>, Sep 2019.	A hybrid Deep Learning model to be designed for Anomaly Detection in Cloud Datacentre Networks.	The model leverages the advantages of multi-objective optimization and deep learning, particularly for feature extraction and anomaly detection on real-time network traffic streams

Gaps Identified

- Go through the challenges from the literature review, summarize the gaps.

Minimum 3 points to be listed

Problem Statement

- From the gaps identified, pick one single problem statement

Dataset

- Give the details of the dataset

Plan of Action/Member Tasks

- Table listing Member information with the tasks they are responsible for and status of completion.
